

## **NORR Systems partnering with Supero Seiki for the Coal and Cement Handling System**

For more than 20 years, NORR Systems has been providing reliable and high quality services and systems to the Marine & Offshore, Oil & Gas industries. With the aim of providing total solution to customers, the company has settled on partnering with Supero Seiki to deliver Coal and Cement Handling Systems.

**Supero Seiki Co., Ltd.** has been in the industry for Coal and Cement Handling Systems for more than 30 years now. It takes pride in introducing itself as only company in Japan to design and manufacture total system of Bulk Handling System and Powder Handling System for both Ground Facility/Silo and Bulk Carrier like a Cement Carrier and Fly Ash Carrier.

The company has been active in the Cement handling system since its establishment in 1973. This was brought by the steady demand in Cement industry. On the other hand, coal is one of the basic materials for energy source all over the world. Supero Seiki was able to deliver handling systems to Hanjin Shipbuilding, Tabuchi Kaiun, Hokuriku Electric Power Co., Tong Yang Cement and others.

Coal and Cement Handling Systems makes the loading and unloading of the cement and coal carrier faster and more efficient. Its main purpose is to transfer the coal and cement as quickly as possible, making the process almost fully automated. Supero Seiki has both pneumatic and mechanical process for loading and unloading.
