

WELLHEAD CONTROL PANEL

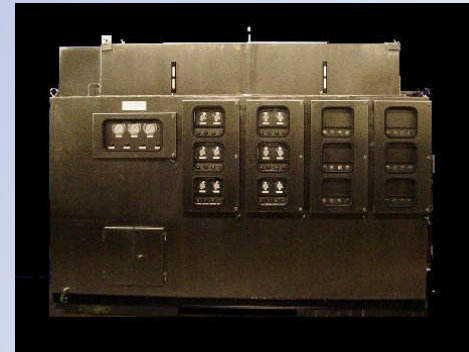

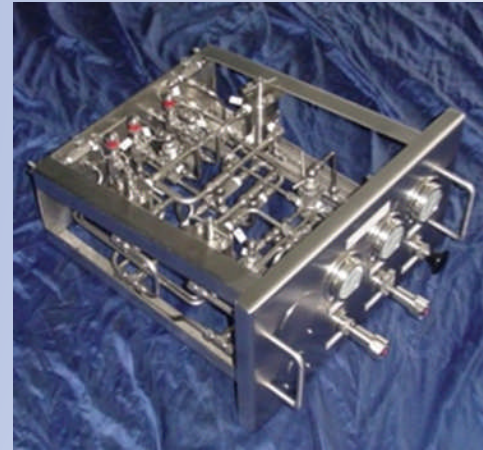

Norr Systems supply Power Generation and control system technology to the oil & gas industry. These include pneumatic, hydraulic and electronically automated control and safety shutdown systems for both manned and unmanned offshore installations.

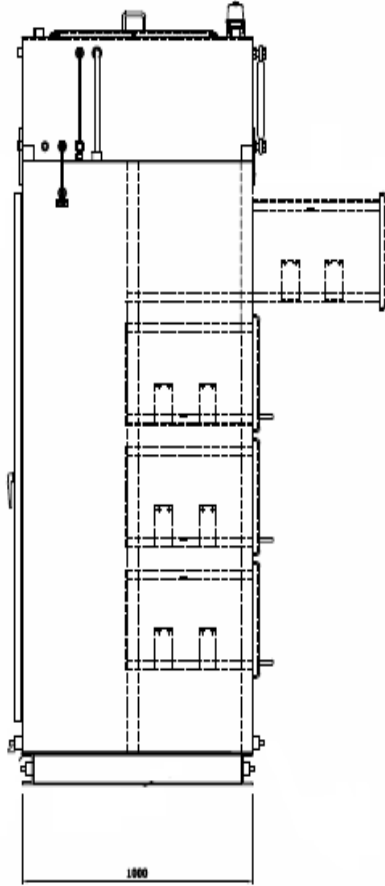

Wellhead Control

- > Single to multi-well packages
- > Automated production control for wellheads and pipeline valves

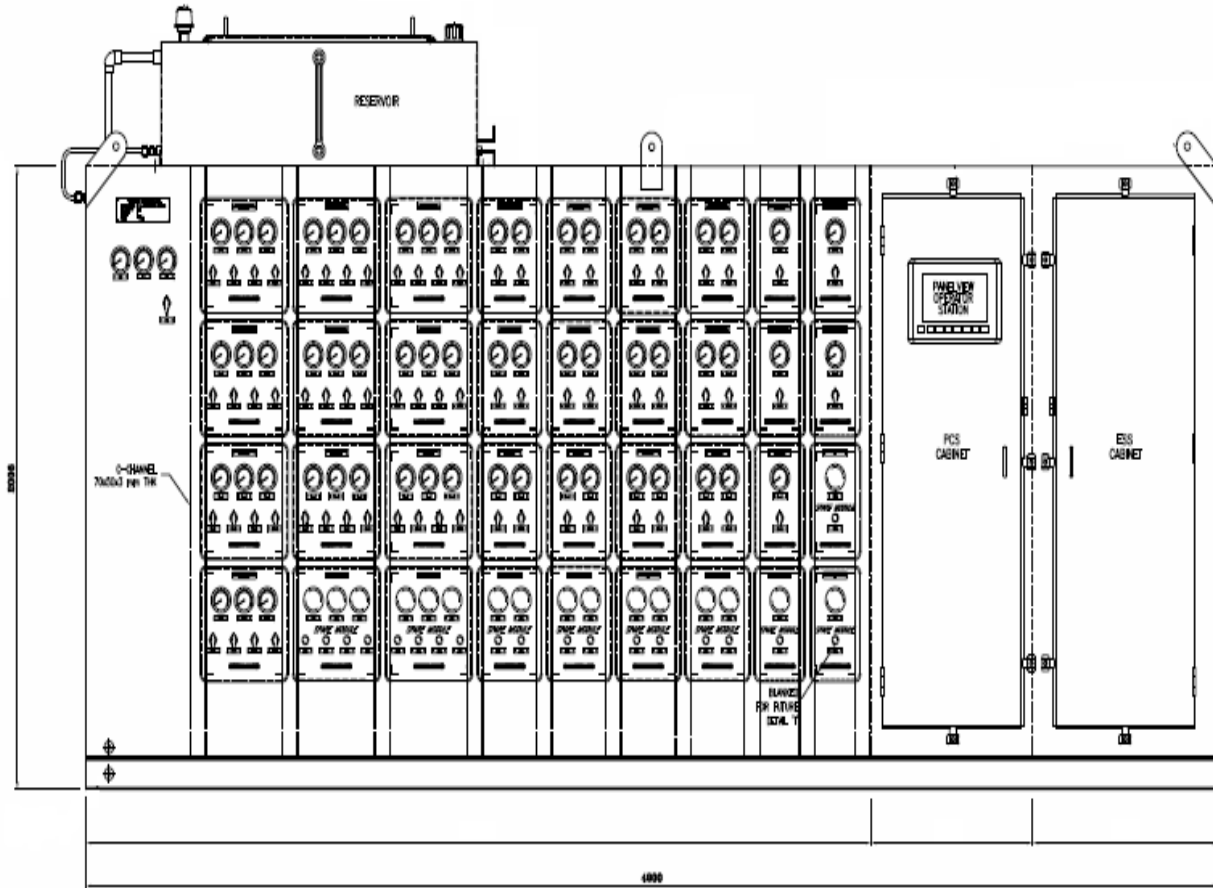

Hydraulic Power Units

- > Generation and storage of hydraulic pressure using oil/water based fluids at pressures in excess of 1,000 barg
- > For wellhead control or subsea distribution
